Brett Lane, the CEO and founder of Freight Dogs, is a visionary entrepreneur who has revolutionized the auto transport industry. With a passion for technology and a deep understanding of the challenges faced by shippers, Lane has built a company that offers a seamless and efficient vehicle shipping experience.

Lane's journey in the auto transport industry began in 2004 when he co-founded Allied Auto Transport. Over the years, he witnessed firsthand the inefficiencies and frustrations that plagued the industry. Shippers faced long wait times, hidden fees, and unreliable carriers. Lane recognized the need for a better way and set out to create a company that would transform the auto transport process.

Freight Dogs: The Innovation Revolution

In 2015, Lane launched Freight Dogs, a digital-first auto transport marketplace that leverages technology to streamline the shipping process. The company's proprietary software platform connects shippers directly with carriers, eliminating the need for brokers and reducing the time and cost of shipping a vehicle.

Freight Dogs' technology also provides real-time tracking and updates, allowing shippers to track the progress of their shipment from pickup to delivery. The company's customer-centric approach ensures that shippers are kept informed every step of the way.

Customer-Centricity: The Core of Freight Dogs' Success

At Freight Dogs, customer satisfaction is paramount. The company has built a reputation for providing exceptional customer service and going the extra mile to ensure that every shipment is handled with care.

Lane attributes Freight Dogs' success to the company's unwavering commitment to its customers. "We understand that shipping a vehicle can be a stressful experience," he says. "That's why we're dedicated to providing our customers with a hassle-free and transparent process."

The Future of Auto Transport

Freight Dogs is at the forefront of innovation in the auto transport industry. The company is constantly developing new technologies and partnerships to enhance the shipping experience for its customers.

Looking ahead, Lane envisions a future where auto transport is fully automated and integrated with other aspects of the supply chain. He believes that technology will play a pivotal role in driving efficiency and reducing costs for shippers and carriers alike.

Freight Dogs is a testament to the power of innovation and customer-centricity. Under the visionary leadership of Brett Lane, the company has revolutionized the auto transport industry with its cutting-edge technology and unwavering commitment to its customers.

As the industry continues to evolve, Freight Dogs is poised to remain at the forefront of innovation, leading the way towards a more seamless and efficient future for auto transport.
