Before we dive into the licks, let's take a look at some basic slide guitar techniques.

- **Holding the slide:** The slide is typically held between the thumb and first two fingers of the fretting hand. The slide should be placed perpendicular to the strings, and the thumb should be slightly behind the slide.
- **Sliding:** To slide, simply move the slide up or down the strings while fretting the strings with your other fingers. The slide should move smoothly and evenly, without any jerking or skipping.
- **Bending:** Bends can be added to slides by pushing or pulling the slide in the direction you want to bend the string. Bends can add a lot of expression and emotion to your playing.

Now that we have covered some basic slide guitar techniques, let's take a look at 100 slide guitar licks in the style of some of the world's greatest blues players.
