Quilting is a centuries-old craft that involves sewing together layers of fabric to create a warm and durable covering. Quilts can be made from a variety of materials, including cotton, wool, and silk. The most common type of quilt is the patchwork quilt, which is made from pieces of different fabrics sewn together in a geometric pattern. Other types of quilts include appliqué quilts, which are made by sewing fabric shapes onto a background fabric, and crazy quilts, which are made from randomly sewn pieces of fabric.

Quilts have a long and rich history. They were originally used as a way to keep warm during the winter months. However, over time, quilts became more decorative and were used to adorn beds and walls. Today, quilts are still popular for both their warmth and beauty.
