In this exclusive interview, Barnwell shares his unique approach to the game, his strategies for winning, and his thoughts on the future of craps.

### What is your approach to the game of craps?

My approach to craps is based on the idea of "controlled shooting." This means that I try to control the dice as much as possible, in order to increase my chances of hitting the numbers I want.

I use a variety of techniques to control the dice, including:

- Gripping the dice in a specific way
- Setting the dice in a specific position on the table
- Rolling the dice with a specific amount of force

By controlling the dice, I can increase my chances of hitting the numbers I want, and thus increase my chances of winning.

### **What are your strategies for winning at craps?**

I have a number of strategies that I use to win at craps. Some of my most successful strategies include:

- **The Rolling Thunder Progression:** This is a betting progression that I developed that allows me to increase my bets when I'm winning, and decrease my bets when I'm losing.
- **The Craps Commandments:** These are a set of rules that I follow when I'm playing craps. These rules help me to avoid making mistakes and to maximize my chances of winning.
- **The Dice Control Method:** This is a method that I use to control the dice. By controlling the dice, I can increase my chances of hitting the numbers I want, and thus increase my chances of winning.

These are just a few of the strategies that I use to win at craps. By following these strategies, I have been able to achieve a high level of success at the game.

### **What are your thoughts on the future of craps?**

I believe that the future of craps is bright. The game is becoming increasingly popular, and there are a number of new technologies that are being developed that will make the game more accessible and more exciting.

One of the most important trends in the future of craps is the development of online craps games. Online craps games allow players to play craps from anywhere in the world, at any time of day or night. This is making the game more accessible to a wider range of players.

Another important trend in the future of craps is the development of new dice control methods. These methods are allowing players to control the dice with greater precision, which is increasing their chances of winning.

As craps continues to evolve, I believe that the game will become even more popular and more exciting. I am excited to see what the future holds for craps.

Scott Barnwell is the world's foremost expert on the game of craps. He has developed a number of unique strategies for winning at craps, and he has achieved a high level of success at the game.

In this interview, Barnwell shared his approach to the game, his strategies for winning, and his thoughts on the future of craps. I encourage you to learn more about Barnwell's work, and to apply his strategies to your own craps game.
