Vocal fold injection is a procedure that is used to improve the voice in people who have vocal fold paralysis or weakness. The procedure involves injecting a material into the vocal folds to make them thicker and more vibrate.

Vocal fold injection dick is a rare complication of vocal fold injection. It is thought to be caused by the injection material leaking into the penis. The condition is more likely to occur in men who have had multiple vocal fold injections.

## **Symptoms of Vocal Fold Injection Dick**

The symptoms of vocal fold injection dick can include:

\* A painful, firm lump in the penis \* Difficulty urinating \* Blood in the urine \*  
Erectile dysfunction \* Painful ejaculation

## **Diagnosis of Vocal Fold Injection Dick**

Vocal fold injection dick is diagnosed based on a physical examination and a history of vocal fold injection. Your doctor may also order an ultrasound or MRI to confirm the diagnosis.

## **Treatment of Vocal Fold Injection Dick**

Treatment for vocal fold injection dick typically involves surgery to remove the lump. The surgery is usually performed under general anesthesia.

In some cases, your doctor may recommend a less invasive treatment, such as laser therapy or radiation therapy. These treatments can help to shrink the lump and improve symptoms.

## **Prevention of Vocal Fold Injection Dick**

There is no sure way to prevent vocal fold injection dick. However, the following tips may help to reduce your risk of developing the condition:

\* Talk to your doctor about the risks of vocal fold injection before you undergo the procedure. \* Be sure to follow your doctor's instructions after vocal fold injection. \* Avoid strenuous activity after vocal fold injection. \* See your doctor immediately if you experience any symptoms of vocal fold injection dick.

## Outlook for Vocal Fold Injection Dick

The outlook for vocal fold injection dick is generally good. With early diagnosis and treatment, most men can make a full recovery. However, the condition can lead to permanent erectile dysfunction in some cases.

Vocal fold injection dick is a rare but serious condition that can affect men who have undergone vocal fold injection. The condition is characterized by the development of a painful, firm lump in the penis. In severe cases, the lump can block the urethra, making it difficult to urinate. Treatment for vocal fold injection dick typically involves surgery to remove the lump.

If you are considering vocal fold injection, be sure to talk to your doctor about the risks of the procedure, including the risk of vocal fold injection dick.
